Motor Starter Protectors

SIRIUS 3RV1 motor starter protectors up to 100 A

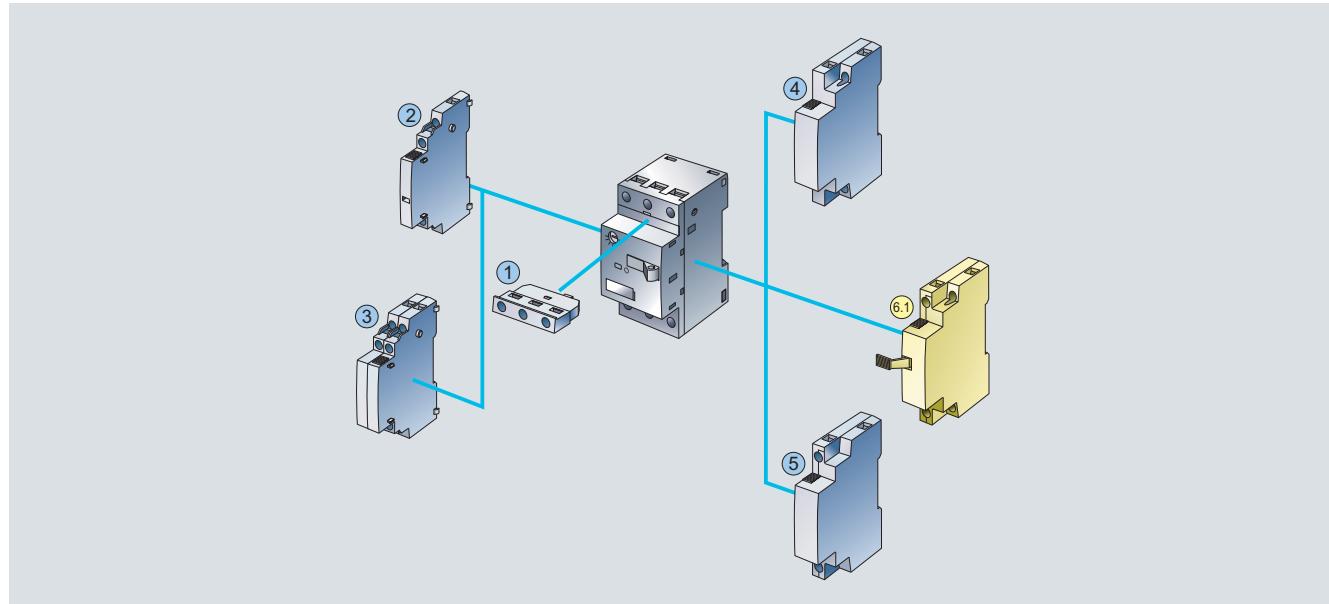

General data

Overview

The following illustration shows our 3RV1 motor starter protectors with the accessories which can be mounted for the various sizes, [see also "Introduction" → "Overview" on page 7/2](#).

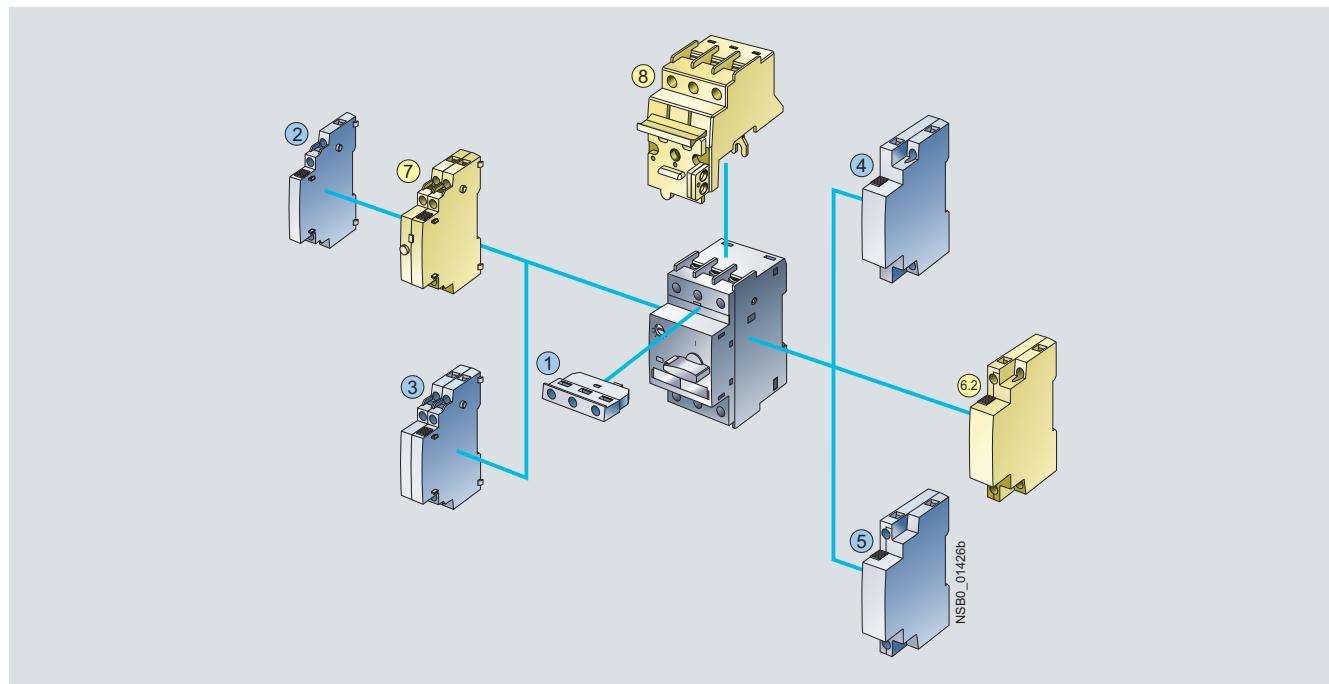

"Accessories" [see page 7/18 onwards](#).

Motor starter protectors/circuit breakers, size S00, with mountable accessories

7

Motor starter protectors/circuit breakers, sizes S0, S2 or S3, with mountable accessories

Mountable accessories for all sizes S00 ... S3

- ① Transverse auxiliary switch (can not be used with 3RV17 and 3RV18 circuit breakers)
- ② Lateral auxiliary switch with 2 contacts
- ③ Lateral auxiliary switch with 4 contacts
- ④ Shunt release
- ⑤ Undervoltage release

Mountable accessories

- | | |
|---|-----------|
| ⑥.1 Undervoltage release with leading auxiliary contacts | For sizes |
| ⑥.2 Undervoltage release with trailing auxiliary contacts | S00 |
| ⑦ Alarm switch | S0 ... S3 |
| ⑧ Isolator module | S0, S2 |

Motor Starter Protectors

SIRIUS 3RV1 motor starter protectors up to 100 A

General data

Size S0 motor starter protector

3RV1 motor starter protectors are compact, current limiting motor starter protectors which are optimized for load feeders. The motor starter protectors are used in accordance with IEC 60947 for switching and protecting three-phase induction motors of up to 45 kW at 400 V AC and for other loads with rated currents of up to 100 A.

The 3RV1 motor starter protectors are generally approved according to IEC and UL/CSA.

According to UL 508 the 3RV1 motor starter protectors in sizes S00 to S3 are approved as

- "Manual motor controllers"
- "Manual Motor Controllers" for "Group Installations"
- "Manual Motor Controllers Suitable for Tab Conductor Protection in Group Installations"
- "Self-Protected Combination Motor Controller (Type E)"
This approval does not apply to size S00. Furthermore, the 3RV10 motor starter protectors in sizes S0 and S3 must be equipped with additional feeder terminals.

3RV2 motor starter protectors in sizes S00 and S0 up to 40 A [see Catalog IC 10 · 2012](#).

The 3RV17 and 3RV18 are approved as circuit breakers according to UL 489; they are a special variant of the 3RV1 motor starter protectors.

Type of construction

The 3RV1 motor starter protectors are available in four sizes:

- Size S00 - width 45 mm,
max. rated current 12 A,
at 400 V AC suitable for induction motors up to 5.5 kW
- Size S0 – width 45 mm,
max. rated current 25 A,
at 400 V AC suitable for induction motors up to 11 kW
- Size S2 - width 55 mm,
max. rated current 50 A,
at 400 V AC suitable for induction motors up to 22 kW
- Size S3 - width 70 mm,
max. rated current 100 A,
at 400 V AC suitable for induction motors up to 45 kW

3RV2 motor starter protectors in sizes S00 and S0 up to 40 A
[see Catalog IC 10 · 2012](#).

Circuit breakers acc. to UL 489

The 3RV17 and 3RV18 circuit breakers are available two sizes:

- Size S0 – width 45 mm
3RV17 21: max. rated current 22 A at 480 Y/277 V AC
3RV18 21: max. rated current 20 A at 480 Y/277 V AC
- Size S3 – width 70 mm
3RV17 42:
max. rated current 70 A at 480 Y/277 V AC,
max. rated current 10 A to 30 A at 480 V AC.

3RV27 and 3RV28 circuit breakers in size S00 up to 15 A
[see Catalog IC 10 · 2012](#).

Connection methods

The SIRIUS 3RV1 motor starter protectors can be supplied with screw terminals or spring-type terminals.

Screw terminals

Spring-type terminals

The terminals are indicated in the corresponding tables by the symbols shown on orange backgrounds.

"Increased safety" type of protection EEx e according to ATEX directive 94/9/EC

3RV10 motor starter protectors are suitable for overload protection of explosion-protected motors with "increased safety" type of protection EEx e;
[see www.siemens.com /sirius/atex](#).

Motor Starter Protectors

SIRIUS 3RV1 motor starter protectors up to 100 A

General data

Application

Operating conditions

3RV1 motor starter protectors are suitable for use in any climate. They are intended for use in enclosed rooms in which no severe operating conditions (such as dust, caustic vapors, hazardous gases) prevail. When installed in dusty and damp areas, suitable enclosures must be provided.

3RV1 motor starter protectors can optionally be fed from the top or from below.

The permissible ambient temperatures, the maximum switching capacities, the tripping currents and other boundary conditions can be found in the technical specifications and tripping characteristics, see "[Reference Manual for Protection Equipment – Motor Starter Protectors · 3RV1 Molded Case Motor Starter Protectors](#)".

3RV1 motor starter protectors are suitable for operation in IT systems (IT networks). In this case, the different short-circuit breaking capacity in the IT system must be taken into account.

Since operational currents, starting currents and current peaks are different even for motors with identical power ratings due to the inrush current, the motor ratings in the selection tables are only guide values. The specific rated and start-up data of the motor to be protected is always paramount to the choice of the most suitable motor starter protector. This also applies to motor starter protectors for transformer protection.

Possible uses

The 3RV1 motor starter protectors can be used:

- For short-circuit protection
- For motor protection (also with overload relay function)
- For system protection
- For short-circuit protection for starter combinations
- For transformer protection
- As main and EMERGENCY-STOP switches
- For fuse monitoring
- For operation in IT systems (IT networks)
- For switching of DC currents
- As voltage transformer circuit breakers
- In areas subject to explosion hazard (ATEX)
- As circuit breakers according to UL 489 (3RV17 and 3RV18)

More details see "[Reference Manual for Protection Equipment – Motor Starter Protectors · 3RV1 Molded Case Motor Starter Protectors](#)".

¹⁾ Guide value for 4-pole standard motors at 50 Hz 400 V AC. The actual starting and rated data of the motor to be protected must be considered when selecting the units.

²⁾ For overload protection of the motors, appropriate overload relays must be used.

Auxiliary switches and other accessories can be ordered separately (see "Mountable Accessories" on page 7/18 onwards).

Multi-unit and reusable packagings

- Size S0 on request
- Sizes S2 and S3 see Catalog IC 10 · 2012
